de Cirugía Torácica" AIACT

THE SAGRADA FAMÍLIA BASILICA OF BARCELONA: ANTONI GAUDÍ PROJECT AND ITS CONSTRUCTION

Jordi Faulí

Director architect of the Sagrada Família

The architect Antoni Gaudí worked forty-three years in the Sagrada Família until his death in 1926.

He built the Nativity façade and prepared documents to the future construction: drawings, plaster models and descriptions. Also he prepared the method of design and construction to the future architects, based in the use of geometrical surfaces never used in the architecture until then. After his death his disciples finished the Nativity Façade and build the Passion Façade. And after the interior church was built and the sic central towers, that will be finish the next year. All the new parts built follow the Gaudí project and advanced tools of design and construction have been used.
